TL 40

The simple, compact tunnel luminaire.

All easy in the tunnel.

Tunnel lighting is always a challenge, even for smaller and less frequented tubes. With SITECO you don't have to resort to large solutions, even on a small scale, when safety and reliability are required.

That's what the TL 40 is for: Robust and uncomplicated in continuous use. Efficient in handling and operation. It is designed for common tunnel layouts, where it ensures uniform illumination and the safety of all road users despite wide luminaire spacing. The housing of the TL 40 has a particularly compact design, which makes it perfectly suitable for low ceiling heights.

TL 40 – that is modern, uncomplicated tunnel lighting from planning to operation

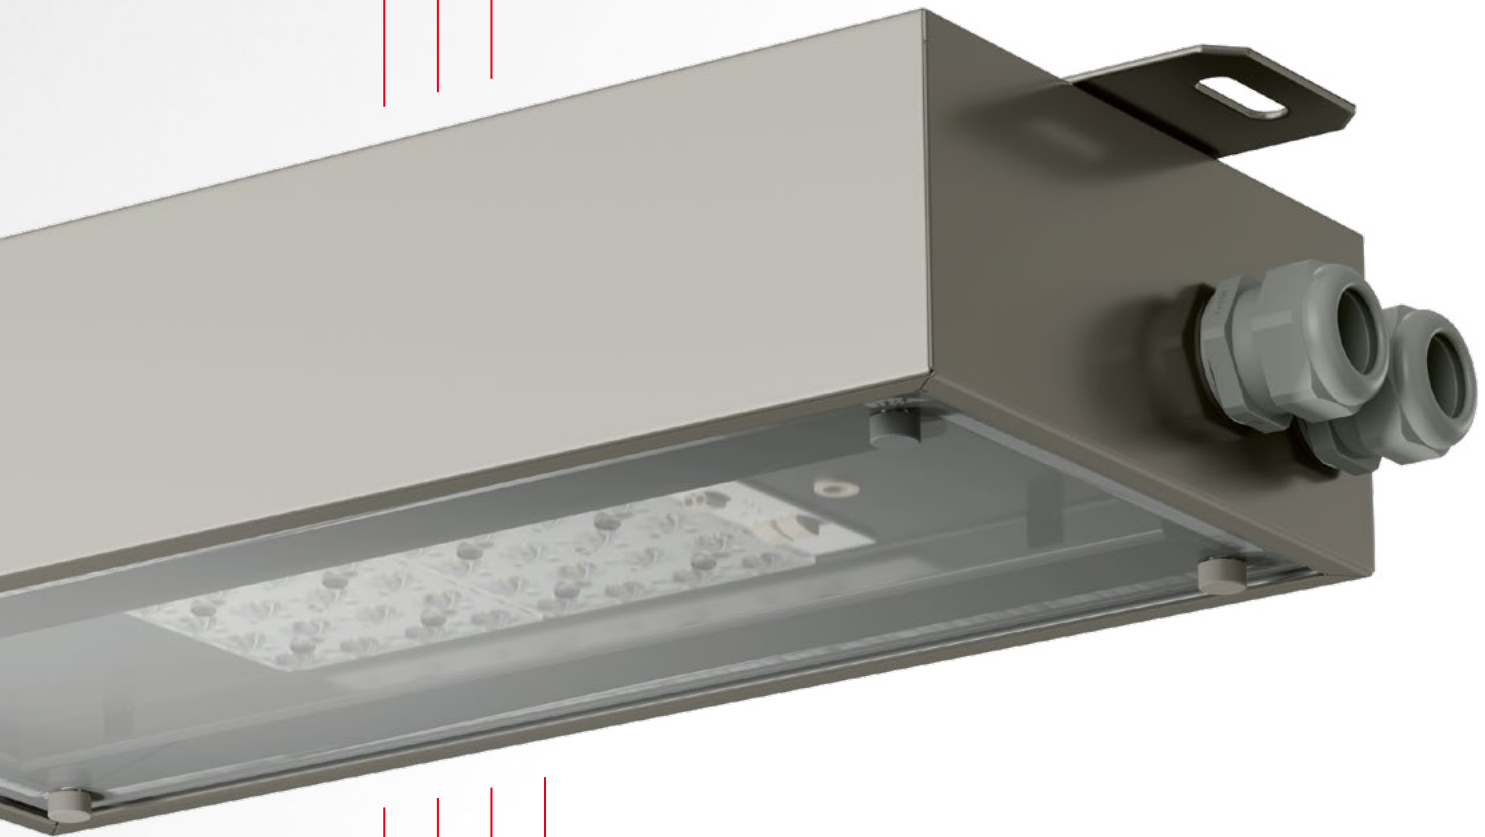

- **No worries.** Corrosion and mechanical tunnel cleaning do not affect the TL 40. For that purpose, it is made out of high-quality stainless steel 1.4404.
- **No stress.** Can do a lot, but needs no frills. The TL 40 makes installation, connection and maintenance really simple. So you can stay relaxed.
- **No unnecessary expenses.** The TL 40 operates twice as efficient as conventional tunnel luminaires. And often fewer light points suffice. For cool calculators: low invest, low energy costs.

Precisely fitting configuration thanks to a flexible modular system with different optics depending on tunnel geometry

Very good visibility conditions for drivers with uniform, powerful and standard-compliant light, even with luminaire spacing of over 18 m

Easy to control via 10 StepDIM or DALI

Economical and reliable continuous operation with very low luminous flux reduction up to L95 / B10 at 100,000 h

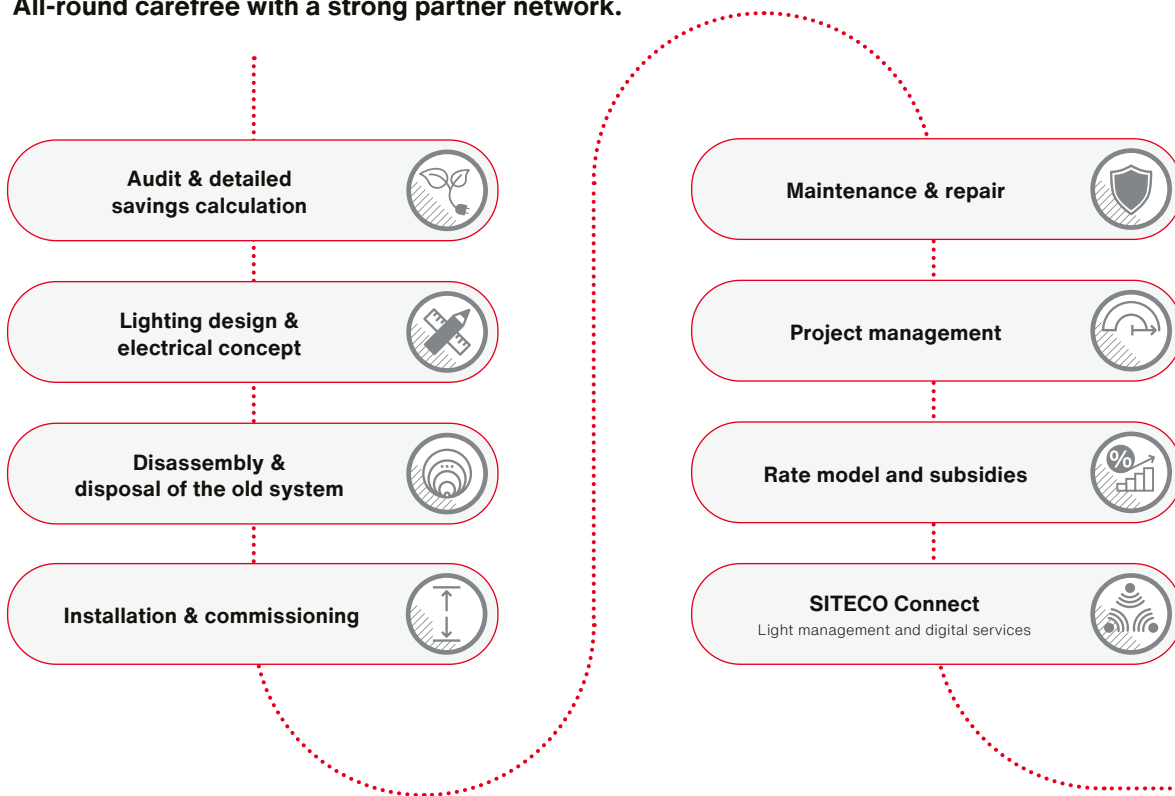

Durable thanks to corrosion-resistant stainless steel

Easy handling thanks to different mounting devices and through-wiring as well as fire protection line as branch line

Easy maintenance of all components thanks to modular design

SITECO Services

All-round carefree with a strong partner network.

With our service model, you get turnkey solutions from a single source – from planning and installation to maintenance and financing. The choice is yours: from pure lighting to the “all-round carefree package”.

SITECO is your planning and development partner for every lighting solution.
