sports

The dream of a slender, floating glass plane providing quality lighting has finally been accomplished. The unique combination of material and pattern leads the eye from changing moiré effects to the clean, precisely defined geometry of the aluminium and glass luminaire, that finds its place in modern architecture and is equally suited to the rigours of modern office work.

Hamburg design prize 2003

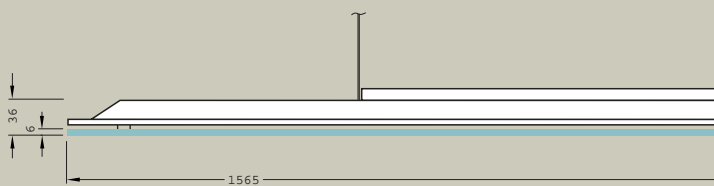

The elegant design of Lightpane was awarded in September 2003 in Hamburg by the city design committee, responsible for promoting state-of-the-art design standards for all industrial products.

Order numbers

5LM37562XL1S luminaire with 2xT5 HO80 W, HFG-Dynamic

5LM37572XL1S luminaire with 2xT5 HO80 W, HFG
