Connect Sports
Effortless lighting
control over
your facilities.

Project: Newmarket Town FC,

Newmarket, Great Britain

Product: Floodlight FL 20

Take control of the training grounds with a simple solution

SITECO has created a simple and easy-to-use lighting control system. This system makes the operation and modification of the different lighting scenarios more comfortable. With the help of our intuitive interface, you can program the lighting according to your needs in no time at all. When necessary, you may only need sections of the field for youth games or individual training. Allowing the user to roam free yet remain in control.

- **Simple light control** with Tablet or Smartphone (Android or iOS), Wifi Connection and new cabling aren't necessary
- **Flexible usage & settings** to support your individual lighting needs
- **Maximum possibilities for energy savings** due to adapted lighting scenarios
- **A minimum amount of infrastructure needed**, Compatible with each version of FL 20 maxi DALI
- **No licensing fees**

Bring your sporting organization to light at the push of a button

The floodlights can be controlled on multiple devices with different accounts. Meaning that the light scenes can be configured according to the respective training conditions and needs of different coaches. To ensure safety and security we have secured the app so that only authorized persons have access.

SITECO Connect Sports App Interface

Easily create your own customized scenarios.

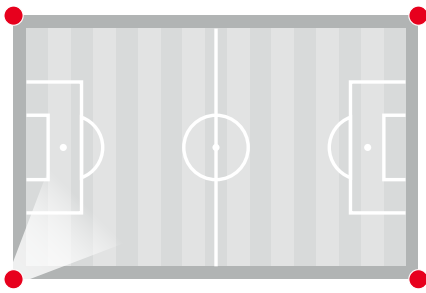

There is often a multitude of different lighting scenarios during a training and match week. Being able to create your own personalized scenarios is simple and easy to program.

- ✓ **Individual app accounts**
- ✓ **Eliminate outside interference**
- ✓ **Ensured safety and security**

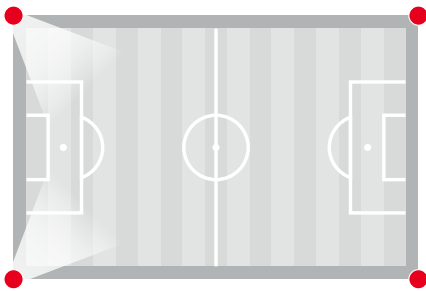

Sports in the optimum lighting

Wide range of lighting scenarios.

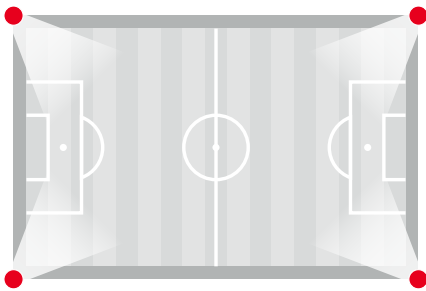

Multifunctional single light

Turn on a single floodlight for smaller tasks. Team talks, individual training.

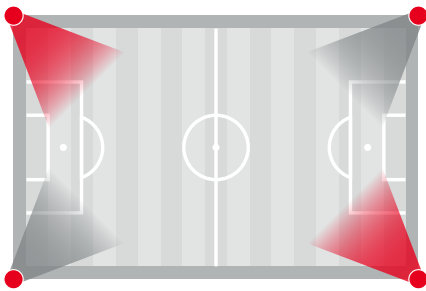

Half field lighting

The user will have the opportunity to voluntarily illuminate half of the pitch only. Saving energy on unused field lighting.

Nighttime Kick off

100 % lighting on the entire pitch. Dim your lights (%) depending on players preferences.

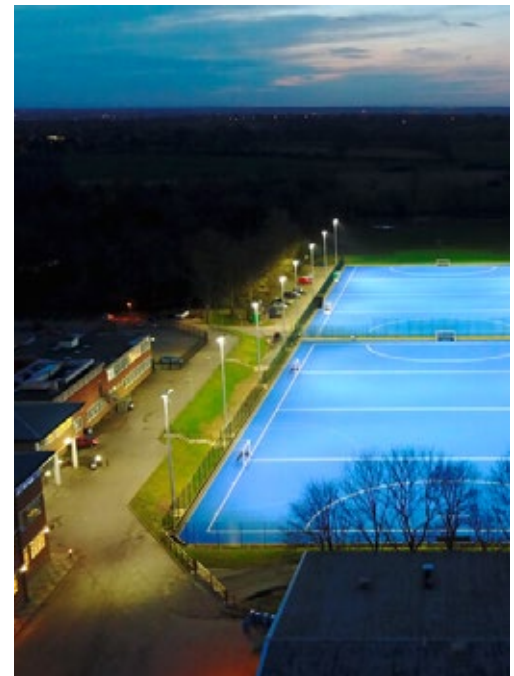

Goal celebration

When a player scores a goal, there is the option to briefly flicker the lights (7 secs). Lighting an electric atmosphere for players and spectators.

The versatile facilities of the future

Indoor hall applications

Professional sports today, trade fair events venue tomorrow. There are various settings in app that allow you to turn on any number of lights or dim them to a desirable percentage in your sporting halls.

Multi court facilities

If you have multiple tennis courts keeping track of which courts are in use is important. Serving the proper light at the right time.

- ✓ **Attainable Installment**
- ✓ **Flexible control**
- ✓ **Energy saving**

Bring exciting new lights to your club

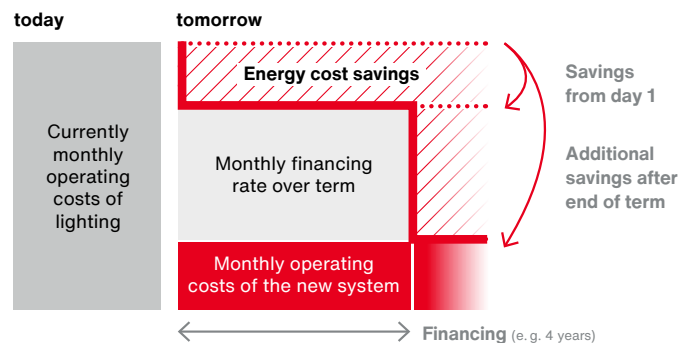

Connect Sports can be installed with existing SITECO DALI compatible floodlights.

Replacing or renovating a fixture is also quick and attainable. Thanks to our **financing**.

Invest into the future and earn money at the same time – made easy:

Saving you money from Day 1

Earn money easily with the lighting solutions of tomorrow. To us, renovating facilities also means financing. Making Connect Sports a dream come true for everyone.

Projekt: Kristiansund BK, Kristiansund, Norwegen
