SITECO upgrade kit:

Reduce your costs.
Minimize energy use.
Protect the environment.
Upgrade now!

Upgrade kit for **Streetlight SL 10 and SL 11 Plus**

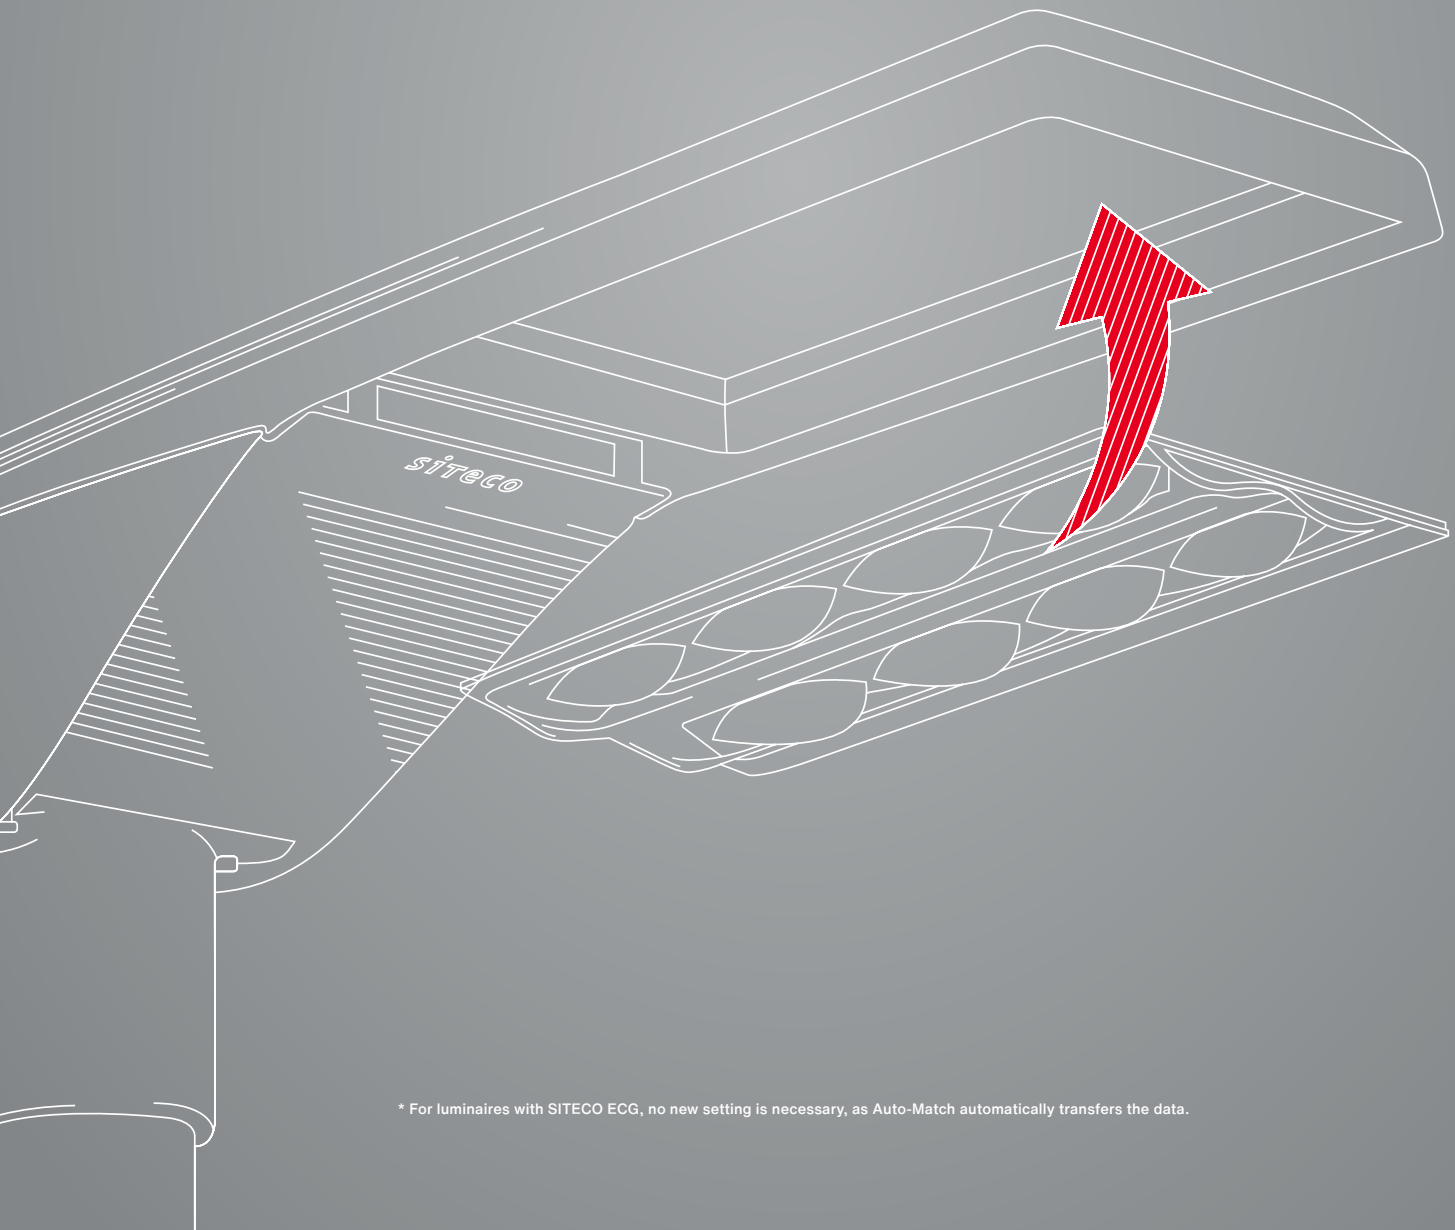

**Upgrade now to state-of-the-art LED technology.
Bring sustainability to life with the SITECO upgrade kit.**

SITECO Auto-Match*:

The easy and clever way to upgrade!

Saving energy through an upgrade sounds good, but you're hesitating because reading out operating hours or dimming settings and manually transferring them seems like a chore? Then we've got good news for you: SITECO upgrades are comfortable and easy – and done with lightning speed!

STECO Auto-Match: upgrades as simple as possible thanks to automatic data transfer. ECG and LED board communicate with each other, making it easy for you to replace and update components: whenever a new element is added to the luminaire, it automatically receives all necessary settings and information. You don't have to do anything! Save time and effort while easily benefiting from lower operating costs and intelligently designed functions.

* For luminaires with SITECO ECG, no new setting is necessary, as Auto-Match automatically transfers the data.

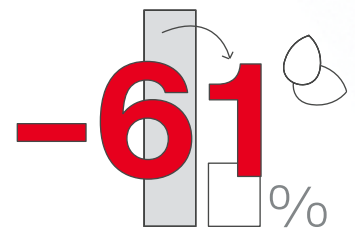

Don't buy new, exchange: And protect the environment. Along with your budget.

Years ago, you invested in a Streetlight SL 10 or SL 11 Plus? Great! On the outside, our luminaires are built to last thanks to their weatherproof aluminum housing – and all the technical components on the inside are quickly and easily exchanged.

Leave 80 % of the luminaires on the mast and simply replace LED module and ECG: This is sustainability in action and updates your streetlights with the latest cutting-edge technology. And your energy costs? They drop significantly – from day one!

So you'd like to save energy without expending much effort? Then it's time for an upgrade!

Significantly lower your operating costs, reduce energy consumption up to 61 %, realize huge cost savings compared with purchasing new, and conserve resources in the process: all this is possible with just one upgrade.

A big win for the environment.

Protecting the environment and conserving nature have never before been so important as now. So it's good that technology is also getting more and more eco-sensitive; with insect-friendly light colors and increased precision in illumination. With our luminaires, you only need to replace individual components to immediately meet all legal requirements. Budget-friendly and easy to do.

Available light colors*:

1,800 K, 2,200 K,
2,700 K, 3,000 K,
4,000 K, 5,000 K.

Easy exchange:

LED module on the mast
can be replaced without
an ESD environment.

No reprogramming:

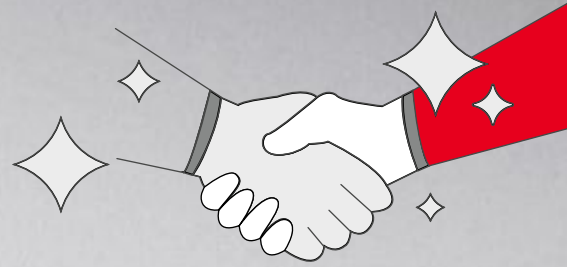

Replace ECGs in
record time with
SITECO Auto Match.

Meets current standards:

Light colors that don't attract
insects and preserve the
natural darkness of night.

* Not all light colors are available for all luminaire types.

An upgrade sounds good, but how? Really easily together with SITECO!

Would you like to replace an ECG? LED module and ECG? No matter what you decide to do, exchanging components is quick and effortless. Replacing the LED module doesn't require ESD protection, and you can replace the ECG in no time at all – after all, SITECO Auto Match automatically transfers all data.

And should you have any questions along the way, we're there to help you. If you'd like, we can provide support for the entire exchange process. Let's join forces and get started!

The numbers tell it all: An upgrade pays off – right from the start!

	Old system	New system	New vs. old
Luminaire type	SL 10 mini, 740, 3,800lm, 51W	Replacement LED module, 740, 3,800lm, 19.7W	
No. of luminaires	50	50	
Annual energy consumption in kWh	10,710	4,137	-6.573
Annual CO₂ emissions in t	6.4	2.5	-4.0
Annual operating costs in €	5,355	2,069	-3,286
			Amortization
Annual savings from day one*		-24 %	2.43 years
Annual cost savings at end of term*		-61 %	

61% lower CO₂ emissions each year

When replacing the LED module and ECG, the amortization period totals about **3.9 years**.

* Costs for installation and spare parts taken into account. Electricity price: € 0.50

SITECO upgrade kit:

Reduce your costs.
Minimize energy use.
Protect the environment.
Upgrade now!

Streetlight SL 10 and SL 11 Plus: Absolutely future proof. And 100 % sustainable.

Thanks to a clever modular concept, our Streetlight SL 10 and SL 11 Plus never get old – they just get better and better. Simply exchange LED module and ECG, and your luminaire is again state of the art.

Cost effectively and anytime. Today and in the future.

Head into the future with our upgrade kit. Lower your costs, consume less energy and boost your efforts to protect the environment.
