Rotationally symmetric highbay luminaire for industry and retail

- Suitable for mounting heights from 5 to 20 m
- Direct replacement for luminaires with 250/400 W HQI/HQL lamps
- Two construction sizes, two lumen outputs, two light distributions*
- Glare reduction up to UGR < 19 (type-dependent, with accessory)
- Suitable for challenging ambient conditions (IP65/IK08)
- Suitable for the food industry (IFS)
- D symbol for dusty surroundings
- Decorative accessories for the retail sector
- Simple 1-point mounting

Compact High Bay

Light is straightforward

Simple. Efficient. Versatile.

Logistics, production areas, handcraft.
Commerce, centers, halls.

Compact High Bay is a rotationally symmetric highbay luminaire in two construction sizes for the industry and retail sectors. Various reflectors as decorative accessories are available for retail applications that also further improve the luminaire's glare control (up to UGR < 19).

The highbay also scores with longevity and simple handling. The rounded upper side resists dirt and dust deposits and the housing design simultaneously implements intelligent thermal management via a flue effect. With IP65 protection and IK08 impact resistance the luminaire also withstands tough ambient conditions, and with its D symbol is suitable for operating sites exposed to fire hazards due to dust and fiber particles (also with conductive dust). Installation is via simple 1-point mounting to a chain or with a mounting bracket. Existing chain suspension units can still be used because all luminaires are supplied with a multicarabiner hook.
