Ripple control replacement with SITECO Connect.

You want to switch and dim your lighting centrally or need to replace your existing ripple control system?

Click here for information on order numbers and training offers:

Plug & Play into the future:

SITECO Connect is an innovative and functional lighting control for control cabinet installation. And a perfect replacement for your old ripple control system.

Get ready for tomorrow! With SITECO Connect:

- **Dim and switch outdoor lighting automatically**
 - depending on ambient brightness
 - astro clock
 - time of day and weekday
 - with motion detectors or depending on traffic volume
- **Use existing or new twilight switch**
- **Read energy meters remotely**

Ripple control replacement and group control in detail:

- **Control cabinet with 3 relay outputs**
for connection to contactor or control wire
- **Other actuators or sensors**
like twilight, traffic or weather sensors can be integrated with cables or built-in wireless connections
- **Remote configuration and control** via SITECO Connect
- **Can be seamlessly integrated into SITECO Connect 11 and 21 networks**
- **Remote access via**
 - inexpensive cellular SIM card (5-year term in scope of delivery, flexibly expandable)
 - local mesh network
- **Automatic position detection and radio clock via GPS**
- **Antennas for mobile radio, mesh and GPS already installed**
- **Simultaneous, synchronous switching of all lights**

Update your system now.
And profit from additional control features.
